2 Summary of significant accounting policies

2.1 Accounting basis of the consolidated financial statements

The financial information and accounting policies of the Bank are in accordance with the accounting practices established by the Superintendence of Banks of the Dominican Republic as stipulated in its Accounting Manual for Financial Institutions, regulations, circulars, resolutions, instructions and specific provisions issued by this agency and the Monetary Board of the Dominican Republic, as well as those provided in the Monetary and Financial Law. These practices differ in some respects in the form and content of the International Financial Reporting Standards (IFRSs) applicable to banks and financial institutions. Consequently, the accompanying consolidated financial statements - statutory basis are not intended to present the financial position, results of operations and cash flows in accordance with the IFRSs.

Subsidiaries include: insurance companies, pension fund managers, administrator of health plans and a security exchange, which have been prepared in accordance with the accounting practices established by the Superintendence of Insurance, the Superintendence of Pensions, the Superintendence of Health and Labor Risks and the Superintendence of Securities of the Dominican Republic, respectively. Furthermore, unregulated subsidiaries whose accounting practices are in accordance with the International Financial Reporting Standards. The figures of these subsidiaries that are incorporated in the consolidated financial statements have been prepared following those accounting basis.

The consolidated financial statements - statutory basis, and the explanatory notes have been prepared in thousands of Dominican Pesos (RD\$).

Notes to the Consolidated Financial Statements - Statutory Basis

(In Thousands of Dominican Pesos)

2.1.a <u>Differences between banking regulations and International Financial Reporting</u> Standards

The accounting practices set forth by the Superintendence of Banks of the Dominican Republic differ from International Financial Reporting Standards in certain aspects. A summary of the most relevant differences is as follows:

The allowance for loan portfolios corresponds to the amount determined based on a risks assessment carried out by the Bank, the level of reserves required for the classification assigned to each loan (for commercial loans denominated as major debtors), the number of days past due (for consumer, mortgage and minor commercial loans) and some specific approvals issued by the Superintendence of Banks. This evaluation (for major commercial debtors) includes the ability to pay based on a review of credit records, payment history and collateral levels which are only considered to determine the provisions, following the guidelines of the Instruction for the Asset Evaluation (REA), the Instructions for the Asset Evaluation Process in Permanent Regimes and related circulars, as well as some specific exemptions to certain loans that specific sectors of the economy promote. In accordance with IFRSs, loan portfolios are assessed by separating individual and collective loans. Individual loan analysis is evaluated on a loan-by-loan basis.

In the case of loans that are collectively evaluated to determine whether impairment exist, the estimate of the contractual cash flows of the assets credit group, analysis of historical losses and Management's opinions on whether the current economic situation and loan conditions may change the actual level of the inherent historical losses are considered. A provision is recognized, if objective evidence exist that there has been an impairment loss, which would result in the difference between its carrying amount and the present value of the estimated future cash flows discounted at the original effective interest rate and not taking into account any waiver.

ii) Banking regulations requires financial institutions to establish allowances for assets received in loans settlements, according to the following criteria: moveable goods are reserved over a two year period, on a straight line basis, starting six months following foreclosure (at 1/18th monthly.); real estate is reserved over a three year period, on a straight-line basis counted as of the first anniversary of its recording in the Bank's books (at 1/24th monthly). IFRSs require that these assets be reserved only in the event of impairment.

Notes to the Consolidated Financial Statements - Statutory Basis

(In Thousands of Dominican Pesos)

- iii) Interest receivable past due for less than 90 days, is reserved according to the classification granted to the corresponding principal. Past due interest receivables with more than 90 days if fully reserved, except for credit card transactions, which are fully reserved after 60 days past due. Subsequent accrued interest is not recognized in the unconsolidated financial statements statutory basis, the accrual interest is suspended and recognized in the memorandum accounts. In accordance with IFRSs, allowances on interest receivable are determined based on existent risks in the portfolio (incurred loss model instead of the expected loss model). In the event of impairment, the loans are adjusted and subsequent accrual of interest is based on the adjusted balance using the effective interest rate.
- iv) Financial institutions translate all foreign currency items at the official exchange rate as established by the Central Bank of the Dominican Republic at the balance sheet date. IFRSs require that all foreign currency balances be translated at the exchange rate at which the Bank had access at the balance sheet date.
- v) The Superintendence of Banks of the Dominican Republic requires that reserves held on loans at the moment of executing their collateral, be transferred to the assets received in loan settlements. IFRSs only require reserves when the fair value of the asset is lower than its book value or when impairment exists.
- vi) There are differences between the presentation and certain disclosures of the financial statements according to IFRSs those required or authorized by the Superintendence of Bank.
- vii) According to banking regulations, income from renewal of credit cards, letters of credit card operations and outstanding acceptances are immediately recognized. In accordance with IFRSs, these are deferred and recognized as income over the term of the credit cards, letters of credit and outstanding acceptances.
- viii) The Superintendence of Banks of the Dominican Republic requires leasehold improvements and computer software must be previously authorized by the Superintendence of Banks in order to be recognized as property, furniture and equipment and intangible assets, respectively, and classify them as other assets until such approval is obtained. The Superintendence of Banks indicates the amount that could be capitalized and the maximum amortization period during which the deferral is allowed. IFRSs require that these items be recognized as property, furniture and equipment and intangible assets as long as they generate future economic benefits.
- ix) The Superintendence of Banks of the Dominican Republic has established that short-term highly liquid investments that are easily convertible to cash be classified as investments. IFRSs requires that this type of investments with original maturities of three months or less be classified as cash equivalent.

Notes to the Consolidated Financial Statements - Statutory Basis

(In Thousands of Dominican Pesos)

x) The Superintendence of Banks of the Dominican Republic requires that financial institutions classify investments into four categories, which are: trading, available-forsale investments, held-to-maturity investments, and other investments in debt securities. Also, the Superintendence allows classifying in one of the first three categories only those investments listed in an active market. Investments held for trading and available-for-sale should be measured at fair value, and investments held to maturity and other investments in debt securities at amortized cost. IFRSs do not prescribe the category of other investments in debt securities and the classification will depend on management's intentions.

The investment portfolio is classified according to the risk categories determined by the Superintendence of Banks that require specific provisions, following the instructions of the Assets Evaluation Regulation, the handbook for Evaluating loans, Investments and Contingent Operations of the Public Sector, the handbook for the Asset Evaluation Process in Permanent Regimes and specific provisions. IFRSs require determining allowances based on the assessment of the existent risks on the basis of an incurred loss model instead of an expected loss model.

- xi) The Bank assesses the useful life of items of property, furniture and equipment at the time of acquisition, and recognizes in memorandum accounts the fixed assets that are fully depreciated. IFRSs require that the residual value and the useful life of an asset be reviewed at least at each financial year-end, and if expectations differ from previous estimates, the changes are accounted for as a change in accounting estimates.
- xii) The Superintendence of Banks, allowed multiple service banks the revaluation of its properties as of December 31, 2004 and has not required updating these values after that date. IFRSs state that these updates must be performed whenever significant value changes occur forn such assets.
- xiii) The Superintendence of Banks requires that cash flows corresponding to loans portfolio and customers' deposits, be classified as investing and financing activities, respectively. IFRSs require that the cash flows from these transactions be recognized as part of operating activities.
- xiv) The Superintendence of Banks of the Dominican Republic requires banks to recognize an allowance for contingent operations, which includes, among others, granted guarantees, non-negotiable letters of credit issued, and unused amounts of lines of credit of automatic use, based on a classification of risk category following the REA. IFRSs require recognizing a provision when there is a present obligation as a result of a past event, and it is probable that an outflow of economic benefits will be required to settle the obligation and a reliable amount can be estimated.
- xv) In accordance with the practices established by the Superintendence of Banks, other operating income, such as credit cards commissions are immediately recognized as income, rather than in the period in which it expects to provide the service as required under the IFRSs.

Notes to the Consolidated Financial Statements - Statutory Basis

(In Thousands of Dominican Pesos)

- xvi) The Superintendence allowed the Bank to recognize as income commissions collected on discount of invoices at the time of the operation. IFRSs require that these commissions be deferred and recognized as income using the effective interest method.
- xvii) The Superintendence of Banks allowed the Bank to calculate the actuarial liability related to the Pension and Retirement Funds paid directly by the Bank over a nine year-period beginning in 2011. IFRSs establishes that pension plan obligations must be recognized initially in full and periodically updated in subsequent periods and the effects to be recognized either in profit or loss or other comprehensive income.
- xviii) Banking regulations require that investment in stocks be valued at the lower of fair value or cost. If a security market does not exist, they are valued at cost less impairment, assessing the quality and solvency of the issuer, using the instructions of the Assets Evaluation Regulation and the handbook for the Assessment Evaluation Process in Permanent Regimes. In accordance with IFRSs it must be determined if there is control or significant influence. If control exists, the consolidated financial statements must be prepared. If it is determined that there is significant influence, investments must be recognized under the equity method and those that do not comply with the two above features are carried at fair value with either changes in profit or loss or in other comprehensive income, depending of the classification.
- xix) In accordance with current banking regulations, the Bank must quantitatively disclose the risks derived from its financial instruments, such as liquidity and interest rate risks and the credit risk of the loans, among others. IFRSs require the following disclosures that allows users of the financial statements to evaluate: a) the importance of the financial instruments in relation to the financial position and results of the entity and b) the nature and scope of the risks resulting from the financial instruments to which the entity is exposed during the period, the reporting date and how the entity manages those risks.
- The Superintendence of Banks does not allow the release of provision for assets awarded without prior authorization. In case of the sale of assets awarded that are provisioned, if the sale occurs at a higher value than its book value, it cannot be recognized as a gain as required by the IFRSs, but instead the provision released must be transferred to other regulatory provisions or request authorization from Superintendence of Banks to recognize them as income.
- xxi) The Superintendence of Banks of the Dominican Republic, authorized the inclusion in the consolidated financial statements, the financial statements of subsidiaries that were prepared following different accounting practices to those in the Accounting Manual for Financial Institutions without being homogenized with the accounting practices followed by the Bank. Under IFRSs, entities included in the consolidation should follow the same accounting policies.

Notes to the Consolidated Financial Statements - Statutory Basis

(In Thousands of Dominican Pesos)

- xxii) The Superintendence of Banks, authorized the Bank to classify as accounts receivable some discounts on invoice operations. In accordance with International Financial Reporting Standards, these operations must be classified as loans portfolio.
- xxiii) The Superintendence of Banks, authorized financial intermediation institutions to write off a loan with or without guaranties when it becomes a non-performing portfolio, excluding related-party loans, that should be written off when all legal collection processes have been exhausted and the involved officers and/or directors have been removed from their duties. The IFRSs require these write offs immediately when loans are determined to be unrecoverable.
- IFRSs require that, if the Bank has other comprehensive income, an income statement and comprehensive income financial statement must be presented or a separate statement of other comprehensive showing the nature and amount of line items for other comprehensive income during the reporting period. The Superintendence of Banks of the Dominican Republic does not include this requirement in their preparation of financial statements statutory basis.
- xxv) The Superintendence of Banks authorized to account foreign currencies sales transactions with the Central Bank of the Dominican Republic, in which the Bank is entitled to receive US dollars at a maximum rate agreed, and which are disclosed and accounted as foreign currency balances for the purposes of determining the net position in foreign exchange. IFRSs require that these operations be recognized at fair value as derivative financial instruments.
 - 2.1.b <u>Differences between the accounting practices issued and allowed by the for Insurance Companies in the Dominican Republic and International Financial Reporting Standards:</u>
 - i) As established by the Superintendence of Insurance, short-term insurance contracts are recognized as revenue when billed; as a result, unearned premium reserves are computed based on specific percentages according to the line of business and are not based on a pro-rata distribution over the term of the policy. These minimum percentages are established in Article 141 of the Insurance and Surety Bonds Law No. 146-02, as follows:
 - 15% Transportation and freight
 - 5% Collective life insurance, accidents and health, provided premiums are collected on a monthly basis
 - 40% Surety bonds
 - 40% other insurances

In accordance with IFRSs, income from insurance contracts, both general and short-term life insurance, is recognized proportionately over the term of the policy.

Notes to the Consolidated Financial Statements - Statutory Basis

(In Thousands of Dominican Pesos)

In the case of long-term life insurance contracts with a guaranteed minimum term, the premium income is recognized when payment is received from the insured party.

In the case of long-term life insurance contracts without a fixed guaranteed term, such as death or survivorship insurance, premiums are recognized in a deferred income, which increases by the interest or changes in unit prices and lowers management fee policy, fees, mortality and any other withdrawals.

- ii) In accordance with IFRSs, investments are classified into four categories: financial assets at fair value with changes through profit and loss, held-to-maturity financial assets, loans and receivables, and available-for-sale financial assets. In accordance with IFRS investments are classified into four categories: financial assets at fair value with changes through profit and loss, held-to-maturity financial assets, loans and receivables, and available-for-sale financial assets. Under IFRSs these investments must be recognized initially at fair value and subsequent to their initial recognition, are measured at amortized cost and, fair value with changes in profit or loss or at fair value with changes in equity depending on its initial classification. Additionally, IFRS does not provide for other investments classification. The accounting practices followed by the Bank initially recognizes the investments at fair value and subsequently measured at amortized cost.
- iii) The Superintendence of Bank, establishes that premiums receivable that are considered uncollectible by the Bank are reversed against income. In accordance with IFRSs, premiums receivable should be assessed regularly and a provision should be created for amounts deemed uncollectible. This provision should be recognized through a charge to operating expenses of the year.
- iv) The recognition of specific reserves for claims incurred but not reported at the statement of financial position date is not required. IFRSs require creating a provision for those probable and quantifiable losses and that these be recognized through a charge to operations of the year in which the incident occurred.
- v) According to accounting practices of the Superintendence of Insurance, the Bank accounts for salvage accounts and recoveries in memorandum accounts, and should not be recognized in the accounting until disposal. IFRSs establish that at the balance sheet date of the consolidated financial statements, such assets shall be measured at fair value less any cost of sale and recognized as other assets against a deduction of the cost of the claims that gave rise to the salvages in the accounting period in which the Bank obtained the rights over the salvages and recoveries.
- vi) According to accounting practices of the Superintendence of Insurance, savings components of life insurance contracts are not accounted separately in the balance sheet. IFRSs require to account separately for the deposit components and recognize the premium paid by the life insurance policy as a financial liability.

Notes to the Consolidated Financial Statements - Statutory Basis

(In Thousands of Dominican Pesos)

- vii) Service components that form part of the insurance contract and recognized as revenue together with the written premium income are not separated. The International Financial Reporting Standards requires to separate from an insurance contract, those service components for which the Bank does not retain any insurance risk. Such component should be recognized as a liability, and any commission collected on the intermediation of services shall be deferred as income over the term of the policy that originated such commission.
- viii) Additional costs incurred in the process of acquisition and issuance of insurance contracts are recognized as expenses when they occur, except commissions to agents, which are amortized in proportion to the premium that originated it following the percentages established by the Superintendence of Insurance. According to IFRSs these costs must be deferred and recognized as expense using the straight line method over the life of the related insurance contract.
- ix) Accounting practices of the Superintendence of Insurance, establishes the classification of property, plant and equipment of the use of the asset. IFRSs require that property, plant and equipment which intended use to obtain revenues from rent shall be classified as investment property. The recognition and presentation of investment property differs from the assets that are being used in in the operations of the Bank.
- x) International Financial Reporting Standards require that a Liability adequacy test be performed. This test is basically a calculation based on a statistical methodology that determines if provisions recognized by the Bank are adequate to honor possible commitments arising from current insurance contracts. Accounting practices of the Superintendence of Insurance does not require this kind of provision.
- xi) The Superintendence of Insurance and the Superintendence of Health and Labor Risk requires that short-term investments, highly liquid investments and investments easily convertible to cash be presented as investments. International Financial Reporting Standards require that such investments be presented as cash equivalents.
- xii) International Financial Reporting Standards require an entity to separate embedded derivative from the host contract and accounted for as a derivative if economic characteristic and risks of the embedded derivative are not closely related to the economic characteristic and risks of the host contract. Accounting practices established by the Superintendence of Insurance and the Superintendence of Health and Labor Risk of the Dominican Republic do not provide for guidance on accounting of derivatives.
- xiii) There are certain differences in presentation and disclosures of the financial statements according to the accounting practices established by the Superintendence of Insurance and the Superintendence of Health and Labor Risk of the Dominican Republic and financial statements prepared in accordance with International Financial Reporting Standards.

Notes to the Consolidated Financial Statements - Statutory Basis

(In Thousands of Dominican Pesos)

xiv) The Superintendence of Insurance and the Superintendence of Health and Labor Risk allows that significant revenues and expenses that affect the consolidated financial statements of prior years, be recognized on retained earnings without having to restate the previous reported amounts of the consolidated financial statements. International Financial Reporting Standards require that these transactions be recognized retroactively correcting the previously reported financial statements, including presentation of the statement of financial position for the most recent three years

The Bank has not quantified the effects of differences between the accounting basis and IFRS on the consolidated financial statements - statutory basis.

2.2 Use of estimates

The preparation of the consolidated financial statements - statutory basis requires management to make estimates and assumptions that affect the amounts of assets and liabilities reported and the disclosure of contingent assets and liabilities as of the date of the consolidated financial statements, and the amounts reported as current revenues and expenses. Estimates are used mainly in the determination of provisions for assets subject to risk, depreciation and amortization of long-term assets, impairment of long-term assets and contingencies. Actual results may differ from such estimates.

2.3 Consolidation

The consolidated financial statements - statutory basis include the figures of Banco de Reservas de la República Dominicana, Banco de Servicios Múltiples, and subsidiaries owned either directly or indirectly in more than 50%, which are: Tenedora Banreservas, S. A. and subsidiaries, which include Seguros Banreservas, S. A. Reservas Asistencia, S.A.S., Reservas Inmobiliaria, S. A. and subsidiary, Administradora de Fondos de Pensiones Reservas, S. A. and Inversiones & Reservas, S. A. y Fiduciaria Reservas, S. A., Occidental Security Services, S. R. L. and Inversiones Finanprimas SB, S. A. S. Additionally, Administradora de Riesgo de Salud Reservas, Inc., a non-profit entity whose net assets are included as other liabilities.

All these entities are located and incorporated under the laws of the Dominican Republic. Balances and transactions among the consolidated entities are eliminated in consolidation. There are differences among some of the accounting policies of the subsidiaries, which prepare their financial statements accounting with the accounting practices issued by the Superintendences of Insurance, of Pensions, Health and Labor Risk and of Securities of the Dominican Republic.

The Superintendence of Banks of the Dominican Republic approved the incorporation of the financial statements of these subsidiaries in the consolidated financial statements without homogenizing its accounting practices to the ones followed by the Bank.

Notes to the Consolidated Financial Statements - Statutory Basis

(In Thousands of Dominican Pesos)

The entities included in the consolidated financial statements - statutory basis of Banco de Reservas de la República Dominicana, Banco de Servicios Múltiples, Parent Company, and the following subsidiaries are:

Subsidiaries	Country of Operation	% of Ownership
<u>Directly subsidiaries</u> :		
Tenedora Banreservas, S. A. and Subsidiaries Administradora de Riesgo de	Dominican Republic	97.74
Salud Reservas, Inc.	Dominican Republic	-
Indirectly subsidiaries:		
Administradora de Fondos de		
de Pensiones Reservas, S. A.	Dominican Republic	98.50
Seguros Banreservas, S. A.	Dominican Republic	97.91
Reservas Inmobiliaria, S. A.	Dominican Republic	99.99
Operadora de Zonas Francas		
Villa Esperanza	Dominican Republic	99.99
Inversiones & Reservas, S. A.	Dominican Republic	100.00
Reserva Asistencia, S. A. S.	Dominican Republic	100.00
Fiduciaria Reservas, S. A.	Dominican Republic	100.00
Occidental Security	•	
Services, S. R. L.	Dominican Republic	100.00
Inversiones Finanprimas SB,	•	
S. A. S.	Dominican Republic	100.00

All intra-group balances and transactions that conform the consolidated financial statements - statutory basis, were eliminated on consolidation.

The Superintendence of Banks of the Dominican Republic authorized the Bank to not eliminate the allowance for investment in subsidiaries in the consolidation.

Banco de Reservas de la República Dominicana, Banco de Servicios Múltiples - Regulated by the Superintendence of Banks of the Dominican Republic.

The Bank is the most important entity and provides financial intermediation services such as loans, investments; deposits and financing to the Dominican Government, its autonomous entities and state enterprises (public sector) and to privately owned enterprises and the general public (private sector).

Notes to the Consolidated Financial Statements - Statutory Basis

(In Thousands of Dominican Pesos)

Administradora de Riesgo de Salud Reservas, Inc. - Regulated by the Superintendence of Health and Labor Risks of the Dominican Republic.

It is a Non-For Profit organization dedicated to the management of health insurance plans, established by the National Council of Social Security, in accordance with Law No. 87-01 and its complementary regulations.

Peaje Dominicano, S. A. S.

This Company was incorporated under the laws of the Dominican Republic; its main activity was management of a parking building owned by the Bank. This Company was acquired by the Bank during the year 2014.

Tenedora Banreservas, S. A. and Subsidiaries.

Is the Parent Company of the following subsidiaries:

(a) Seguros Banreservas, S. A. and Subsidiaries - Regulated by the Superintendence of Insurance of the Dominican Republic.

This company is authorized to operate in the field of general insurance and personal insurance in the country, according to Insurance Law No. 146-02.

(b) Administradora de Fondos de Pensiones Reservas, S. A. - Regulated by the Superintendence of Pensions of the Dominican Republic.

It is dedicated to the administration of pension funds of third parties, or plans and pension funds of companies or associations that are entrusted for administration on the basis of specific contracts, according with Law 87-01 that created the Dominican system of Social Security and the complementary regulations to this law.

(c) Reservas Inmobiliarias, S. A. and Subsidiary.

It performs all type of real estate transactions, such as buying, selling, leasing, management and development of real estate properties.

The Subsidiary of Reservas Inmobiliarias, S. A., Operadoras Zonas Francas Villa Esperanza, S. A., is engaged in leasing under the free zone regime certified by the National Council of Export Free Zones.

Notes to the Consolidated Financial Statements - Statutory Basis

(In Thousands of Dominican Pesos)

(d) Inversiones & Reservas, S. A. - Regulated by the Superintendence of Securities of the Dominican Republic.

Inversiones & Reservas, S. A., was incorporated under the laws of the Dominican Republic. Its main purposes consist of buying and selling securities, exchange of securities, underwriting issuance of securities in part or as a whole, for subsequent trade to the public, promoting and facilitating the issuance of securities in public offerings and to perform all operations authorized by the Superintendence of Securities of the Dominican Republic.

(e) Fiduciaria Reservas, S. A.

Incorporated under the laws of the Dominican Republic, its main purpose is to manage businesses, in accordance with Law No. 189-11, relating to Mortgage Market Development and Trust in the Dominican Republic and all operations authorized by the Superintendence of Banks of the Dominican Republic.

(f) Occidental Security Services, S. R. L.

Incorporated under the laws of the Dominican Republic, its main purpose is to provide physical security services, transport of valuables and personal defense training.

(e) Inversiones Finanprimas SB, S. A. S.

Incorporated under the laws of the Dominican Republic, its main purpose is to provide financing to the insured of Seguros Banreservas, S. A., so they can obtain premiums of all types of insurance policies as well as the efforts of collection and legal procedures and compulsive fees and other related services to both individual and corporate.

2.4 Loan portfolio

Loans are carried out at their outstanding balances less the required allowance for loan losses.

The Bank calculates interest on loans to cardholders based on the outstanding balance of the principal.

The Bank assigns to commercial loans that have been restructured an initial classification no lower than "C" independently of their capability and payment behavior and country risk; this can be changed subsequently to a lower risk category based on satisfactory payment behavior. The Bank is also required to create an allowance for consumer and mortgage loans that have been restructured and classified no lower than "D." Such classification may be changed based on payment behavior, which must remain in that category depending on the evolution of payments, but in no event can be classified lower than "B."

Notes to the Consolidated Financial Statements - Statutory Basis

(In Thousands of Dominican Pesos)

Furthermore, the Bank applies the arrears method to over 90 days past due loans, considering the total amount of principal past due when one installment payment has fallen into arrears.

The Bank suspends the accrual of interest on loans when past due for more than 90 days and 60 days for credit cards. (See note 2.5.3).

2.5 Determination of provisions to cover credit risks on loan losses in the loans portfolio, other assets and contingent operations

2.5.1 Allowance for loans portfolio

The determination of the allowance for loan losses in the loan portfolio, is based on criteria established in Assets Evaluation Regulation, issued by the Monetary Board in its First Resolution dated December 29, 2004, complementary instructional circulars and observations made by the Superintendence of Banks (basis for determining the allowances) and the Handbook for the Assessment Process of Assets in Permanent Regimes issued by the Superintendence of Banks on March 7, 2008.

According to such regulation, the estimate of loan loss reserves in the loan portfolio depends on the type of loan, which can be classified as: major commercial debtors, minor commercial debtors, consumer and mortgage loans. The estimation of the allowance for loan losses for major commercial debtors is based on a detailed quarterly review of each debtor's solvency, payment history and country risk performed by the Bank for 100% of its major commercial debtors (subject to review by the Superintendence of Banks), using specific percentages based on debtor classification, except for loans to the Dominican Republic government institutions and other public institutions that are classified as established by the Handbook for Loan Evaluation, Investments and Contingent Operations of the Public Sector.

Major commercial debtors are classified considering the categorized analysis of each debtor according to their solvency as established in the Assets Evaluation Regulation, and thus evaluating other factors such as liquidity ratios, profitability, leverage, market analysis, historical payment behavior, country risk and alignment. Collaterals, as a safety factor in the recovery of credit operations are considered as a secondary element and are not considered in the debtor's classification, although they are included in the calculation coverage for the required allowances.

Major commercial debtors are those which total approved loans in the financial system, are equal to or greater than RD\$25 million, both individually and consolidated in the system.

The regulation requires creating a provision for the positive exchange differences on foreign currency loans with more than 90 days overdue, considering as a risk exposure 20% of the amount past due on collateralized loans classified as D and E, for more than 90 days past due.

Notes to the Consolidated Financial Statements - Statutory Basis

(In Thousands of Dominican Pesos)

The Superintendence of Banks granted an extension to all financial institutions to require a provision for the positive difference in foreign exchange currency loans, only for those loans classified as D and E with more than 90 days past due, until the Assets Evaluation Regulation is amended.

For minor commercial debtors, consumer and mortgage loans, the allowance is determined based on the days in arrears and collaterals are not taken into consideration. Loan collaterals, as a factor of security in the collection of loans, are considered as secondary element and are not taken into account when determining the debtor's classification, and are only considered loans classified minor commercial debtors.

Write-offs on loans consist of operations by which the uncollectible loans are removed from the balance sheet, being recognized only in memorandum accounts. In the event that the financial institution does not have the total loan allowance, should establish the amount before performing the write-off, in order to not affect the level of allowance required for other loans. A loan may be written off, with or without a collateral, from the day in which the loan enters in a non-performing loan category, excluding related party loans with collaterals that can only be written-off when the Bank can show that the legal proceedures for recovery have been exhausted and the officers or managers directly related have been released of their duties. Write-offs on loans remain in memorandum accounts until the reasons that led to the write-off are not overcome.

Excesses in provision for loan portfolio cannot be released without prior authorization from the Superintendence of Banks, excluding the provisions for interest receivable with more than 90 days.

Collaterals securing loan operations are classified according to the Assets Evaluation Regulation, based on its multiple uses and ease of realization. Each type of collateral is considered as a secondary element in the calculation of provisions coverage, based on a permissible amount established. Acceptable collateral will be accepted based on the discount percentages established in this Regulation at its market value. Collaterals are classified as follows:

Multi-use collateral ("garantías polivalentes")

These collaterals include real estate that is not specific to any activity but has multiple uses, is easily transferable, is easy to convert to cash, easily appraised and easy to monetize without excessive costs and with a stable value. These collaterals are considered at 50% to 100% of its appraised value for the purpose of estimating the risk coverage, depending on the type of collateral.

Notes to the Consolidated Financial Statements - Statutory Basis

(In Thousands of Dominican Pesos)

Specific use collateral ("garantías no polivalentes")

Represents collateral secured by assets difficult to convert to cash or monetize. Generally, these assets are user specific. These collaterals only apply between 30% to 50% of its assessed value for the purpose of estimating the risk coverage provided by such assets.

Each classification of collateral is taken into account in calculating the amount of loan coverage based on schedule 8 (Table 8) the percentages established in the Asset Evaluation Regulation.

Collaterals are measured at fair value that is at their net realizable value through appraisals or certificates prepared by independent professionals, not older than 12 months for personal property, excluding securities, and a term not exceeding 18 months for real estate.

Other Considerations

At March 31, 2015 and December 31, 2014, the Bank has special dispensations from the Superintendence of Banks for accounting and reporting, in particular, some loans granted to specific sectors of the Dominican Republic economy, such as contractors from priority construction projects of the Dominican Republic State, road network development, some power generators institutions and loan portfolios acquired from a local financial institution.

2.5.2 Allowance for loans portfolio of the public sector

At March 31, 2015 and December 31, 2014, the Bank evaluated the portfolio of major commercial debtors of the public sector, as defined by Law No. 6-06 on Public Loans, following the Instructional Guidelines for the Evaluation of Investment Loans and Contingent Operations of the Public Sector and related circulars. Loans granted to some strategic entities of the Dominican Republic electricity sector, were classified as risk "A" and a requirement for the provision of 1% as stated in the ADM/0089/12 Memorandum issued by the Superintendence of Banks in February 8, 2012. Provisions for public sector loans classified as "A", have a provision requirement of "0" as set forth by Memorandum 0981 of December 14, 2012 of the Superintendence of Banks of the Dominican Republic.

2.5.3 Allowance for interest receivable

The allowance for current interest receivable is determined using specific percentages according to the classification granted to the loan portfolio. The allowance for interest receivable on consumer loans, microenterprise and mortgages, is based on specific percentages of each type of loan, depending on the age of the balances set out in the based on days in arrears using parameters established in the Assets Evaluation Regulation.

Notes to the Consolidated Financial Statements - Statutory Basis

(In Thousands of Dominican Pesos)

Interest receivable 90 days past due (except for credit card transactions) is fully reserved. Interest receivable on credit cards is fully reserved over 60 days past-due. Such accounts are then maintained on a non-accrual basis, are recorded as a memorandum account ("cuentas de orden") and interest is recognized as income only when collected.

2.5.4 Allowance for other assets

Banking Regulations for Assets Evaluation establishes a maximum term of three years, starting after the expiration of 120-days period following foreclosure, to create an allowance for assets received in loans settlements. A reserve should be established as follows:

Movable goods: 100% Over two years, recorded on a straight-line basis starting on

the seventh month.

Real estate: 100% Over three years, recorded on a straight-line basis starting on

the thirteenth month.

The corresponds allowances for loan portfolio debtor, which guarantees portfolio debtors, which guarantees have been awarded to the bank, must be transferred to allowances for losses on assets received in loans settlement of loans. The allowance on assets received in loans settlement that have been sold cannot be released without prior authorization of the Superintendence of Banks; however, they can be transferred to other risky assets without prior authorization.

Impairment on the value of assets received in loans settlements is computed as the difference between book and market values determined by independent appraisers, and are recorded as expense when determined.

2.5.5 Allowance for contingencies

The allowance for contingent operations, which includes surety bonds, endorsements, non-negotiated letters of credit, lines of credit and unused credit cards, among others, and which are recognized as other liabilities are determined in conjunction with the rest of the obligations of the debtors' loan portfolio, based on the risk classification of the debtor and the deductible eligible collateral for the purposes of calculating the allowance. The nature and amounts of contingencies are described in note 24 to the unconsolidated financial statements - statutory basis.

Notes to the Consolidated Financial Statements - Statutory Basis

(In Thousands of Dominican Pesos)

2.6 Employee benefit cost

2.6.1 Bonuses and other benefits

The Bank recognizes a provision for personal benefits to its employees such as bonuses, Christmas bonus, vacations and other benefits, among others, as incurred and in compliance with local laws and its own compensation plans.

2.6.2 Defined benefits plan

The Bank - Parent Company has a defined benefit pension plan for employees who worked at the Bank when the Social Security Law No. 87-01 was enacted on May 9, 2001, established by the Social Security System of the Dominican Republic.

The Bank's contribution to the plan is 5.40% of the monthly salaries paid to officers and employees, plus 2.5% of the gross profits of the Bank and extraordinary contributions, as established in the statutes of the Pension Plan approved by the Board of Directors of the Bank. In December 31, 2010, the Superintendence of Banks allowed that the liability for the defined benefit pension plan be recognized prospectively over a nine year period beginning in December 2011.

Additionally, the Board of Director approves pensions to be paid directly by the Bank, which are included in the determination of actuarial liability of the Plan.

The Bank's net obligation with respect to defined benefit plans, is calculated by estimating the amount of future benefit that employees will have earned in the current and prior periods, discounting that amount and deducting the fair value of the plan's assets.

The calculation of the defined benefit obligation is annually performed by a qualified actuary, using the method of projected unit credit. In order to calculate the present value of economic benefits, any minimum funding requirements should be considered.

2.6.3 Defined contribution plan

The Bank makes contributions to the mandatory pension plan, in accordance with the requirements of the Social Security Law No. 87-01, formerly of May 9, 2001, by which was created the Social Security System of the Dominican Republic. This system operates under individual capitalization schemes and requires that individual contributions made by the employer and employee must be managed by the Administradora de Fondos de Pensiones (AFP). The contributions made by the Bank are recognized as expenses when incurred. At retirement age, the employees will receive from the AFP, the amount of their contributions and of the employer plus the accrued income on their individual capital account.

Notes to the Consolidated Financial Statements - Statutory Basis

(In Thousands of Dominican Pesos)

2.6.4 Severance compensation

The Labor Code of the Dominican Republic sets forth the payment of severance indemnities (preaviso y cesantía) to employees whose contracts have been terminated without just cause. The Bank recognizes as expenses the amounts paid for this concept at the time of the termination of employment contracts.

2.7 Outstanding securities and subordinated debts

Outstanding securities comprises liabilities derived from the acquisition of public resources through the issuance of bonds, time certificates, investment certificates and other securities issued by the Bank which are held by the public.

The Bank has subordinated debts relating to financing obtained in US dollars (US\$) by issuing debt securities denominated "Subordinated Debt Notes," issued in the United States of America, and subordinated debt bonds in Dominican pesos issued in the Dominican Republic's market. The subordinated debt is initially recognized at fair value, net of transaction costs and discounts granted on the issuance, which are amortized on the straight-line method over the term of the debt. Financial expenses resulting from interest, commissions, exchange differences and other financial charges arising from the aforementioned obligations are recognized and charged to profit or loss in the period in which they are incurred.

2.8 Valuation of different types of investments

2.8.1 Investments in securities and allowances

Investments are accounted for at cost less required allowances.

The instructions for Classification, Valuation and Measurement of Investments in Debt Instruments requires financial institutions to classify investments in: trading, held to maturity, available-for-sale and other investment in debt instruments.

Trading investments: These are investments that entities hold, with the purpose of obtaining profits derived from the fluctuation in prices as market participants, which are listed on a stock exchange or other type of organized market. Trading investments are carried at fair value, and the changes in value are measured and included in the unconsolidated income statements - statutory basis as a gain or loss on securities fluctuation.

Available-for-sale investments: Includes investments held intentionally to achieve a reasonable return for their temporary surplus or investments that the entity is willing to sell at any time, and are quoted in an active or organized market. Available-for-sale investments are initially recognized at fair value and the changes in the fair value are recognized in equity.

Notes to the Consolidated Financial Statements - Statutory Basis

(In Thousands of Dominican Pesos)

Held to maturity investments: These are investments the Bank has the intent and ability to hold to maturity, are listed in an active and organized market and are recognized at amortized cost using the effective interest method. Premiums or discounts are amortized over the period of the instrument using the effective interest rate.

Other investments in debt instruments: This category includes investments acquired in debt instruments, that because of their characteristics do not qualify for inclusion in the above categories and for which there is no active market. They are recognized at amortized cost using the effective interest method.

For domestic investments in debt securities, the amount of expected losses for impairment is determined based on the criteria used for the evaluation of major commercial debtors, in accordance with the provisions of the Assets Evaluation Regulation. For investments in debt securities in the international market, the amount of expected losses for impairment is determined based on risk ratings assigned by the international rating firms recognized by the Superintendence of Securities of the Dominican Republic or any other internationally recognized rating firm, applying the corresponding provision percentages according to the risk categories established by the Assets Evaluation Regulation.

The investments in the Central Bank of the Dominican Republic, debt securities of the Ministry of Finance and instruments issued or guaranteed by the Dominican State, are considered risk-free; therefore, are not subject to a provision, as authorized by the Superintendence of Banks.

The type of security or financial instrument and its amount, is presented in note 6.

2.8.2 Investments in shares and allowances

Investments in shares are carried out at the lower of cost and market value. If no market exists, they are recognized at cost less impairment, in which is evaluated the quality and solvency of the issuer by using the instructions of the Assets Evaluation Regulation and the handbook for the Asset Assessment Process in Permanent Regimes, except for investments in subsidiaries which are recognized using the equity method, following the Superintendence of Bank's authorization.

Allowances for investments in shares are determined following the same criteria as for major commercial debtor's loan (See note 2.5.1).

The characteristics, constraints, nominal value, market value and number of investments in shares are presented in note 12.

Notes to the Consolidated Financial Statements - Statutory Basis

(In Thousands of Dominican Pesos)

2.9 Valuation of property, furniture and equipment and depreciation method used

2.9.1 Basis of recognition

Property, furniture and equipment, except for land and buildings that existed at December 31, 2004, are measured at cost less accumulated depreciation and impairment losses. At December 31, 2004, land and buildings are recognized at market value, determined by independent appraisers and those acquired after that date are carried at cost.

2.9.2 Depreciation

Depreciation is calculated using the straight-line method.

Depreciation percentages are the followings:

<u>Description</u>	Estimated <u>Live (Years)</u>
Buildings	40
Furniture and office equipment	8
Transportation equipment	4
Computer equipment	5
ATMs	10
Leasehold improvements	5

2.10 Valuation of assets received in loan settlements

Assets received in loans settlements are carried at the lower cost of the:

- a) Value agreed upon payment in kind or the awarded price in a public auction
- b) Market value at the date assets are received
- c) Outstanding balance of the loan plus interest and/or accounts receivable that are being cancelled.

The valuation reserve for these assets is determined following the criteria established by the Superintendence of Banks, as described in note 2.5.4.

2.11 Deferred charges

Deferred charges include prepaid income taxes, deferred income taxes and other prepaid expenses.

Other prepaid expenses are amortized as the prepaid services are received.

Notes to the Consolidated Financial Statements - Statutory Basis

(In Thousands of Dominican Pesos)

2.12 Assets and liabilities in foreign currency

The amounts in the consolidated financial statements - statutory basis are presented in Dominican pesos (RD\$). Assets and liabilities in foreign currencies are translated using the exchange rate set by the Central Bank of the Dominican Republic at the date of the consolidated financial statements - statutory basis. Transactions during the year and income and expenses are translated at the exchange rate at the date of the transaction. Resulting gains or losses of the translation of assets and liabilities in foreign currency are recognized under "Income (expense) from net foreign exchange rate" in the accompanying consolidated income statements- statutory basis.

At March 31, 2015 and December 31,2014, the exchange rates used for the translation of the US dollar balances to Dominican pesos was RD\$44.6596 and RD\$44.2033, respectively.

2.13 Revenue recognition and most significant expenditures

2.13.1 Banks' revenue recognition and expenditures

Financial income and expenses

The Bank recognizes interest income on loans and investments under the accrual method. Loan interest is calculated using the simple interest method on outstanding capital amounts. Interest on loans are no longer recognized and placed on nonaccrual status, when a loan is 90 days past due, except for credit card balances, which are placed on nonaccrual status after 60 days. From these dates forward they are recorded in a memorandum account. Once placed in nonaccrual status the interest are recognized as income only when collected.

By authorization of the Superintendence of Bank, the Bank recognizes as interest income, commissions on discount of invoices when they are collected.

Interest on investments is recognized based on the outstanding balance of the investment. Premium and discounts on the acquisition of these investments are amortized over the life of the investment as part of interest income.

Interest expenses related to acquisition of resources are recognized in the consolidated income statement - statutory basis, based on the accumulation of simple interest, except those corresponding to savings accounts and certificate of deposits with capitalized returns, which are accumulated using the compound interest method (applied to the minimum balance for savings accounts).

Costs directly related to the issuance of subordinated debts are deferred and amortized, and recognized as operational expense using the straight-line method over the term period.

Notes to the Consolidated Financial Statements - Statutory Basis

(In Thousands of Dominican Pesos)

Income from the disposal of other investments in debt instruments

Income from disposal of other investments in debt instruments, are recognized in the consolidated statements of income - statutory basis, as the difference between the amounts received from the sale and the carrying amount of the instruments when the risks and rewards associated with the investment have been transferred to the buyer.

Other income and other operational expenses

Other operational income is recognized when earned and other operational when incurred. Commission income and other services resulting from managing accounts, money orders and transfers, guarantees and endorsements, purchase and sale of currencies, credit cards, use of ATMs and POS, third party collections and others, are recognized on the accrual basis when the services have been provided to the clients.

Other income and expenses

Other income resulting from operations, property leases, sales of real estate and others are recognized when earned and other expenses when generated.

Other income from the recovery of written-off assets and decrease in provision for risky assets are recognized when collected.

2.13.2 Revenue recognition of insurance companies

The most important insurance contracts issued by the Bank's insurance subsidiary are as follows:

- (a) Short-term insurance contracts These are annual, semi-annual or quarterly contracts with renewable options issued by the company and covering personal risks and recognized as income when invoiced.
- (b) General insurance contracts Premiums on these contracts are earned at the time of their underwriting which coincides with the commencement of the term of the contract. Premiums that have been underwritten before the commencement of the term of the contract are unearned and are not recognized in the consolidated financial statements

In accordance with the terms and conditions agreed with the reinsurers, premiums ceded in reinsurance are recognized at the time of recording the premium income. Cancelled premiums are recognized as a deduction of the income for premiums issued.

Notes to the Consolidated Financial Statements - Statutory Basis

(In Thousands of Dominican Pesos)

2.13.3 Revenues from the Administrator of Pension Funds (AFP, in Spanish)

The Administrator of Pension Funds (AFP) receives a management fee and a complementary commission from its affiliates and employer, as well as a fee for optional services offered.

The income from monthly administrative commission is received from Pension Fund T-1 (Contribution) and Pension Fund T-4 (Distribution) and is recognized upon receipt of the resources in the Administrator's account base on 0.5 % of the monthly quotable salary.

The income from the complementary annual commission of the Pension Fund T-I (Contribution), T-4 (Distribution) equals 25% and T-5 (Social Solidarity) equals 15% of the excess of yield portfolio of the weighted average rate of the previous month for all terms of fixed-term certificates of deposits, indefinite certificates of deposit and time certificates issued by commercial and multiple services banks. The rate is reported to the AFP by the Superintendence of Pensions according to the information provided by the Central Bank of the Dominican Republic.

Monthly charges from complementary annual commissions are made on the basis of 50% of the previous month, with the exception of the first month of the year in which is charged 100% of the previous month's balance, following the guidelines of Resolution No. 34 -03, No. 232-05 and No. 239-05.

2.13.4 Revenues for services to the Health Insurance Administrator (ARS)

The Health Insurance Administrator (ARS) recognizes revenues for services, resulting from the basic, complementary prepaid medicine, voluntary and independent plans when using the straight-line method over the coverage of the contract.

2.13.5 Revenues from real estate

Revenues from sale of apartments, houses and land are recognized when all the risks and rewards of ownership or property have been transferred, which regularly occurs upon closure of sales contracts and thus receiving a substantial part of the agreed price.

Income fees from the sale and rent of properties are accounted for when earned.

Rental income of industrial buildings and electrical substations are recognized on a straight-line basis over the term of the lease. Lease incentives granted are recognized as an integral part of the total lease income over the lease period. All other income is recognized on the accrual basis when the service is rendered.

Notes to the Consolidated Financial Statements - Statutory Basis

(In Thousands of Dominican Pesos)

2.13.6 Revenues from parking building

Revenue collection from parking fees is recognized on the accrual basis of accounting, i.e. when the services have been offered to the customers.

2.13.7 Revenues from brokerage services

Revenues from brokerage services are recognized by the accrual basis of accounting, that is, when the services have been offered to the customers and collection is probable.

2.14 Provisions

The Bank establishes provisions whenever it considers that it has incurred an obligation as a result of a past event, when it is probable that it will have to disburse financial resources to settle these obligations and when a reasonable estimate of the amount involved can be made.

2.15 Income tax

According to its Organic Law, Banco de Reservas de la República Dominicana, Banco de Servicios Múltiples, is exempt from income tax payment; however, the Bank calculates and voluntarely pays income tax following some guidelines and special criteria of the Tax Code, considering that the final beneficiary is also the Dominican Republic government. In this regard, the Bank recognizes the tax effects of transactions in the year in which they are included in profit or loss, regardless of when they are recognized for tax purposes, including provisions for risky assets established under the sectorial law in the Assets Evaluation Regulation (REA), and special contributions to the Bank's employees Pension Plan, among others.

In accordance with Law No. 8-90 and Resolution No. 19-02 A of the National Council of free zones, the subsidiary Operadoras de Zonas Francas Villa Esperanza, S. A. is exempt from payment of import tax, customs duties, income tax, and other related taxes, for a period of 15 years in force until 2017. The remaining subsidiaries of the Bank are subject to payment of income tax, for which, the tax effects of the transactions are recognized in the year in which they occurred, regardless of when they are recognized for tax purposes.

Total expense resulting from income tax payment is recognized in the consolidated statement of income - statutory basis.

Deferred income tax is not recognized because the Bank's management cannot guarantee that items that originated them may be deductible in the future.

Notes to the Consolidated Financial Statements - Statutory Basis

(In Thousands of Dominican Pesos)

In the case of other companies included in consolidation, deferred taxes are recognized in respect of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes.

Deferred tax assets in respect of temporary differences are recognized to the extent that it is probable that future taxable profits will be available against which they can be utilized. Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefit will be realized; this reduction shall be reversed to the extent there it becomes probable that sufficient taxable profit will be available.

Deferred tax is measured at the tax rates that are expected to be applied to temporary differences in the period when they reverse, based on the laws that have been enacted or substantively enacted by the reporting date in the consolidated balance sheets.

2.16 Financial Instruments

A financial instrument is defined as cash, evidence of a ownership or interest in an entity, or a contract that creates a contractual obligation or right to pay or receive cash or another financial instrument from a second entity in terms potentially favorable to the first entity.

The estimated market values of the financial instruments of the Bank, book values and methodologies used to estimate them are described below:

Short-term financial instruments

Short-term financial instruments, both assets and liabilities, are carried at cost recognized in the Bank's consolidated balance sheet - statutory basis. This cost is similar to market value because of the relatively short-term period of time between the origination of the instruments and their subsequent realization. This category includes: cash on hand and in banks, certificate of deposits in other banks, bank acceptances, customer's liability acceptances, accrued interest receivable, outstanding acceptances and accrued interest payable.

Investment in securities

The fair values of investments in debt and equity securities are estimated based on cost adjusted for impairment and are determined according to the guidelines issued by the Superintendence of Banks, since there is no active security market in the Dominican Republic that can provide market values.

Outstanding securities

It was not possible to estimate the market value of outstanding securities because there is no active market for these instruments in the Dominican Republic.

Notes to the Consolidated Financial Statements - Statutory Basis

(In Thousands of Dominican Pesos)

Loan portfolio

The loan portfolio is measured at book value, adjusted for loan loss allowance as established by the regulatory authorities. Loans are segregated by type such as commercial, residential mortgage, consumer and credit cards.

Interest on financial assets and liabilities

Interest earned on financial assets is recognized under the accrual method using the simple interest method, based on outstanding amounts of principal. Interest expense on financial liabilities is also recognized using the same method.

2.17 Derecognition of financial assets

Financial assets are derecognized when the Bank losses control and or all contractual rights over such assets. This occurs when the rights are sold, expire, or are transferred.

2.18 Impairment of assets

The Bank reviews all long-lived assets and identified intangibles to determine if events or changes in circumstances indicate that the carrying amounts of these assets will be recovered from operations.

The recoverable amount of an asset maintained and used in operations, is measured by comparing the carrying amount of the assets with the highest discounted expected cash flows to be generated by that asset in the future. If, after making such comparison, it is determined that the assets values have been negatively affected, the amount to be recognized as a loss will be the excess of the carrying amount over the fair value of the asset and such loss is recognized in net income of the year when determined.

2.19 Contingencies

The Bank considers as contingent obligations those operations in which it has assumed credit risks and which, depending on future events, may become direct obligations of the Bank with third parties.

2.20 Accounts receivable

Accounts receivable are measured at amortized cost, net of any impairment loss.

The allowance for doubtful accounts is recognized through a charge to expense account for losses resulting from doubtful accounts. These receivables are charged to earnings when management determines that collectability is doubtful based on installments made, client's payment history and evaluation of collaterals, if they exist.

Notes to the Consolidated Financial Statements - Statutory Basis

(In Thousands of Dominican Pesos)

2.21 Distribution of dividends

The Bank pays dividends based on the results of their operations in accordance with the decisions of the Board of Directors' meeting. As established by Resolution No. 12-2001 dated December 5, 2001, issued by the Superintendence of Banks of the Dominican Republic, which provides the allowed maximum amount of dividends to be distributed among the shareholders, should not be greater than the amount of accumulated retained earnings. This distribution is also subject to the provisions established by the Bank's Organic Law No. 6133 and its amendments (see note 26).

2.22 Revaluation surplus

Revaluation surplus is the difference between the value appraised by independent appraisers and the carrying amount of land and buildings at the time of revaluation, net of the corresponding depreciation.

2.23 Mathematical and technical reserves - life insurance and collective insurance

The insurance subsidiary Seguros Banreservas, S. A. (the Company) determines the mathematical and technical reserves on the basis of net premiums and considers mortality tables and interest used by the Company, and consist of the amount equivalent to the difference between the present value of the Company's obligation towards the insured and the present value of the insured obligations towards the Company, which is determined based on actuarial calculations.

Resolutions 293-09 and 294-09, changed the basis for calculating these provisions, considering the indexed salary which should be determined in accordance with changes in the consumer price index reported by the Central Bank of the Dominican Republic, when the application of this basis results in a lower amount, the original basis of calculation should be maintained. Reserves for outstanding casualty claims regarding disability and survivorship should amount to 45% of the estimated actuarial reserve.

As established in Article 141 of Law No. 146-02 on Insurance and Guarantees of the Dominican Republic, technical reserves for collective life, personal accident and health insurance are calculated on the basis of the following specific percentages:

Collective life, personal accidents and health insurances,
provided premiums are collected on a monthly basis 5%
Personal accidents when the premium is collected at terms 40%
Survivorship and disability 5%

2.24 Reserves for unearned insurance premiums, commissions on unearned reinsurance premiums

Notes to the Consolidated Financial Statements - Statutory Basis

(In Thousands of Dominican Pesos)

As established by Law No. 146-02 of the Superintendence of Insurance, unearned premium reserves, commissions on unearned premiums and unearned commissions on assigned reinsurance premiums are determined based on fixed percentages, as follows:

Transportation and freight insurance	15%
Bank guarantees	40%
For other insurances	40%

2.25 Specific reserves

Claims for insurance contracts that are pending for settlement or payment at the date of the financial statements are recorded as specific reserves.

2.26 Amortization of non-proportional contracts - catastrophic premiums

Non-proportional (catastrophic) contracts have a term from July 1 to June 30 of the following year. Premiums paid on these contracts are amortized on a straight line basis.

2.27 Incurred but Not Reported claim reserves (IBNR)

This reserve represents the amount of claims that have occurred at the date of the financial statements, but have not been reported to the ARS.

Resolution No. 163-2009 of the Superintendence of Health and Labor Risks, states that the Bank should calculate the IBNR reserve based on 10% of the claims incurred during the current period less the claims incurred from the previous year.

2.28 Segment reporting

A business segment is a group of assets and operations that are responsible for providing products or services which are subject to risks and returns that are different from those of other business segments. Geographic segments provide products or services within a particular economic environment that is subject to risk and rewards that are different to other segments in other economic environment.

- (i) Represents loans in compliance with the term of principal payments.
- (ii) Represents principal and interests receivable, that being current or past due, their payment terms and conditions have been changed, resulting in a variation of the interest rate and/or maturity of the original loan contract, as well as credits originated from interests capitalization, past due commissions and other charges of the original loan.
- (iii) Corresponds to principal installments and interests receivable that represent arrears of 31 to 90 days based on the date that principal payment should have been made.
- (iv) Corresponds to total principal and interests receivable that are past due in their principal payments for more than 90 days. For loans payable in installments, the total loan amounts are classified as past due when the installments are more than 90 days past due. It also includes overdrafts in checking accounts with more than three days of maturity.
- (v) Corresponds to principal and interest receivable of loans that are in legal collection process.

(i) Multi-use collaterals are real estate assets that are not specific to a certain activity, can be used for a variety of purposes, easy to convert to cash, easy to appraise, easy to foreclose upon, transferrable without excessive costs and of stable value. These collaterals are considered between 50% and 100% of their value for risk coverage depending on the collateral. These collaterals are considered for coverage according to the following detail:

Type of collaterals	Percentage of Admittance
Public sector securities	100%
Securities issued by the same financial institution	100%
Securities from other financial institution and standby guarantee	95%
Real estate	80%
Inventories	90%
Industry of multiple use	70%
Hotels located in developed touristic zones	70%
Hotels located in recently established touristic zones	50%
Free-trade zones of multiple use	60%
Other multi-use collateral	<u>70%</u>

(ii) Specific-use collaterals are real guarantees that due to their nature are considered of unique use and for that reason present characteristics that are difficult to sell due to their specialized origin. These collaterals apply according to the following percentages:

Notes to the Consolidated Financial Statements - Statutory Basis

(In Thousands of Dominican Pesos)

Motor vehicles with less than five years of use and heavy vehicles with insurance 50% Industry of unique use 30% Other specific-use collaterals 30%

(iii) This item considers as unsecured loans those that are guaranteed by insurance policies ceded and other guarantees.

At March 31, 2015 and December 31, 2014, includes RD\$67,542,253 and RD\$34,255,977, which corresponds to public sector loans, which were included in the Budget of Revenues and Public Expenses Law (Presupuesto de Ingresos, y Ley de Gastos Públicos) authorized by the Ministry of Finance and/or specific laws approving these loans.

As of December 31, 2014, loans to private sector include RD\$28,639 millions, equivalent to credit line operations with contractors who are working with the Dominican Republic Government, guaranteed by the Dominican Republic Government and that the Superintendence of Banks authorized the risk "A" classification with a provision of 1%.

At December 31, 2014, loans to the private sector include an amount of approximately US\$400,000 (equivalent to RD\$17,681,320), corresponding to discounts on invoices transferred without recourse to some electrical generators with which the Dominican State had debts through the Dominican electricity sector, that according to Circular ADM / 0075/15 dated February 5, 2015 were authorized by the Superintendence of Banks and accounted for as loans from the private sector.

From December 2012, the Bank granted loans to public sector entities that were authorized by the Superintendence of Banks to be classified with 0% of provision requirement if the borrower is in the "A" risk category, according to communication No. 0981 dated December 14, 2012 from the Superintendence of Banks.

On March 27, 2014, the Bank signed a transactional framework agreement with a domestic financial institution, in which the following was agreed:

♦ The domestic financial institution sold the Bank a loan portfolio classified by the Superintendence of Banks in the risk categories A, B and C, with a book value of RD\$1,420,009. This portfolio was acquired at a discount of RD\$355,002, which was recognized as other liabilities and then in income during the term of the portfolio.

Notes to the Consolidated Financial Statements - Statutory Basis

(In Thousands of Dominican Pesos)

- According to communication 0379-14 dated June 17, 2014, the Superintendence of Banks gave its no objection to the Bank to classify into an A risk category with 0% of provision requirement. The loans received from the domestic financial institution for a period of two years, counted from the effective date of the actual portfolio transfer dated June 11, 2014.
- ♦ The domestic financial institution transferred to the Bank its loan portfolio, classified by the Superintendence of Banks in risk categories of D and E, with a book value of approximately RD\$800,000. This portfolio is managed by The Bank and its administration. The Bank charges a commission on the amounts recovered.

8 Debtors by acceptances

allowances required							
December 31,							
2014 (d)	RD\$ _	7,932	21,908		5,684	39,564	75,088

- (a) Corresponds to the allowances for assets received in loans settlements.
- (b) This provision is included in the line item of other liabilities in note 20 and the expense for constitution is included in the operating expense item in the accompanying consolidated income statements- statutory basis.
- (c) Represents the amounts of allowance determined by a self-assessment as of March 31, 2015 and December 31, 2014 plus other adjustments made.
- (d) In case that the provisions determined are lower than the provisions made, the Superintendence of Banks of the Dominican Republic does not allow the release of provisions without the prior authorization of the regulatory authorities.

The Superintendence of Banks through Letter No. 0981 dated December 14, 2012, informed the Bank its no objection for loans granted to the public sector classified in the "A" risk category to be treated similar as the issuance of debt securities from the Ministry of Finance and the Central Bank with a provision requirement of 0%.

At December 31, 2014, loans of some major companies of the Dominican electricity sector were classified at risk "A," and with a requirement for provision of 1%, as established in communication ADM/0089/12 issued by the Superintendence of Banks of the Dominican Republic of February 8, 2012. Also, the loans granted for the development of the Dominican road sector, were classified at risk "A" with a 0% requirement provision, as stated in Circular ADM / 0093/14 dated February 26, 2014.

The Superintendence of Banks through communication ADM / 0086/2014 of February 21, 2014, informed the Bank its no objection to develop a financing program of up to RD\$10,000,000 in favor of contractors for priority works, for the Central Government and decentralized and autonomous and nonfinancial public companies, that are classified in risk category "A," and thus establish a provision of 1 percent. According to communication ADM / 0075/15 of the Superintendence of Banks dated February 5, 2015, the amount was increased to a maximum of RD\$17,000,000.

According communication ADM / 0075/15 dated February 5, 2015, the Superintendence of Banks granted its no objection to the Bank to classify as risk "A" with 0% provision loans granted to some electricity generating companies, with which the Dominican government had debts of US\$\$400,000 (equivalent to RD\$17,681,320).

	23,409,692				

a) Corresponds to bonds issued by the Bank on February 1st, 2013, for a nominal value of US\$300,000. This debt generates a nominal interest of 7% annually and has an original maturity of 10 years until February 1st, 2023. This debt issuance was carried out in the United States of America "USA" to qualified institutional buyers as defined in Rule 144A under the *U.S. Securities Act of 1933* and other countries outside the United States of America "USA" according to "*Regulation S*."

Additionally, the bonds have the following characteristics:

- Interest are payable semi-annually on February and August 1st, of each year.
- The bonds will not be redeemed prior to their maturity date.
- The bonds are unsecured.
- In the event of bankruptcy, liquidation or dissolution of the Bank under Dominican laws, the payment of the bonds shall be subject to all existing and future obligations denominated as "Senior Obligations," which include all other liabilities of the Bank.

Notes to the Consolidated Financial Statements - Statutory Basis

(In Thousands of Dominican Pesos)

b) These are bonds issued in the market of the Dominican Republic by the Bank on December 29, 2014, for a nominal value of RD\$10,000,000. The amount placed corresponds to two issuances offered simultaneously of RD\$5,000 million each with a maturity of 10 years until December 29, 2024, and at a variable interest rate equivalent to the weighted interest average rate of multiple banks, published by the Central Bank plus a fixed margin of 2.75%. The effective rate at the time of placement was 9.66%, revisable every six months. These bonds do not have any collateral and at the dissolution or liquidation of the Bank, the payment of the bonds is subject to all obligations of the Bank.

Subordinated debts may be used to compute part of the secondary principal for the purposes of determining the Bank's technical capital.

- c) Correspond to costs incurred in the issuance of bonds, which are deferred and amortized using the straight-line method over the term of the bonds.
- d) Correspond to discounts granted in the issuance of bonds, which are amortized using the straight-line method over the term of the bonds.

22 Technical reserves

The subsidiaries, Seguros Banreservas, S. A. and ARS Banreservas, S. A., maintain ongoing specific mathematical risk reserves set up to meet commitments that derive from the current insurance policies that amounted to RD\$2,449,382 and RD\$2,392,827 at March 31, 2015 and December 31, 2014, respectively.

The movement recorded during the period of the referred technical reserves, is as follows:

		2015			
		Specific			
	Mathematical Reserves and				
		Reserves	Ongoing Risk	<u>Total</u>	
Balance at January 1 st , 2015	RD\$	99,472	2,293,355	2,392,827

Balances at December 31, 2014	5,500	5,500,000	5,500	5,500,000	

The Bank's equity contributions are as follows:

- a) Initial capital of RD\$50,000 according to the Law No. 6133 of December 17, 1962, which amended Article 4 of the Organic Law of the Bank.
- b) RD\$200,000 by delivering state-certified vouchers issued by the National Treasury in 1998.
- c) In accordance with the Law No. 99-05 of April 5, 2001, which amended Article 4 of the Organic Law of the Bank, the Dominican Republic Government issued RD\$1,750,000 bonds in favor of the Bank
- d) In accordance with the Law No. 121-05 of April 7, 2005, the Dominican Republic Government issued RD\$1,500,000 bonds in favor of the Bank.
- e) In accordance with the Law No. 543-14 of December 5, 2014, RD\$2,000,000 by reinvesting dividends to be charged to earnings generated in 2013.
- f) RD\$2,800,000 by transferring RD\$2,357,788 from Other Equity Reserves and RD\$442,212 by reinvesting dividends to be charged to earnings generated in 2014, approved by the Board of Directors by the Eleventh Resolution of the Ordinary Session dated January 22, 2015.

Notes to the Consolidated Financial Statements - Statutory Basis

(In Thousands of Dominican Pesos)

The Bank's net profit will be used as follows:

- 50% For amortization of not less than 5% of certified vouchers of the National Treasurer on behalf of the Dominican Republic Government, plus interest. The resulting surplus will cover the debts of the Dominican Government and its agencies, as well as other needs, as approved by the Board of Directors, upon previous notice to the Executive Branch.
- 35% To be transferred to other equity reserves accounts of the Bank.
- 15% To cover debts of the Dominican Republic Government and its agencies with the Bank.

By the Eighteenth and Second Resolution of the Ordinary Sessions dated January 14 and September 11, 2014 respectively, the Board of Directors approved the distribution of earnings taking into consideration the guidelines for the distribution of dividends to shareholders established in the 7-2002 resolution, issued by the Superintendence of Banks on March 8, 2002, and according to the provisions of Law 99-01 on the distribution of earnings from the Bank. The total profits to be distributed was RD\$570,962, as detailed below:

- i) RD\$442,212 for payment of dividends in shares.
- ii) RD\$75,000 to amortize the National Treasury vouchers.
- iii) RD\$3,750 to offset interest of the National Treasury vouchers.
- iv) RD\$50,000 to offset debts of the Dominican State.

By the Eighteenth and Second Resolution of the Ordinary Sessions dated January 14 and September 11, 2014 respectively, the Board of Directors approved the distribution of earnings taking into consideration the guidelines for the distribution of dividends to shareholders established in the 7-2002 resolution, issued by the Superintendence of Banks on March 8, 2002, and according to the provisions of Law 99-01 on the distribution of earnings from the Bank. The total earnings to be distributed was RD\$6,676,055, as detailed below:

- i) RD\$1,766,341 transferred to equity reserve.
- ii) RD\$2,000,000 for payment of dividends in shares.
- iii) RD\$1,300,000 cash dividends to be delivered to the Dominican State.
- iv) RD\$75,000 to amortize the National Treasury vouchers.
- v) RD\$4,500 to offset interest of the National Treasury vouchers.

Notes to the Consolidated Financial Statements - Statutory Basis

(In Thousands of Dominican Pesos)

- vi) RD\$410,446 to pay with the sale of foreclosed assets transferred to the Dominican State.
- vii) RD\$1,119,768 to offset debts of the Dominican State.

Increase in authorized and paid-in capital:

On December 5, 2014, under Law No. 543-14 was amended Article 4 of the Law No. 6133 of December 17, 1962, Organic Law of the Bank. This amendment established the following:

- ♦ Increase the authorized and paid-in capital of the Bank from RD\$5,500,000 equivalent to 5,500 common shares to RD\$8,300,000 equivalent to 8,300 common shares at March 31, 2015. This capital increase was carried out through the transference of other equity reserves and reinvesting dividends to be charged to earnings generated in 2014.
- ♦ Increase the authorized and paid-in capital of the Bank from RD\$3,500,000 equivalent to 3,500 common shares to RD\$5,500,000 equivalent to 5,500 common shares at December 31, 2014. This capital increase was carried out through the distribution of dividends in 2013.
- ♦ With the projected earnings for the years 2015 and 2016, increase the Bank's authorized and paid-in capital to a maximum amount of RD\$10,000,000 equivalent to 100.000 common shares.

Other equity reserves

In accordance with the Bank's Organic Law, the Bank must segregate 35% of its annual net profit to equity reserves. As of December 31, 2014, the Bank segregated equity reserves in the amount of RD\$2,456,876.

Through Circular SB/0682 dated December 31, 2010, the Superintendence of Banks issued a no-objection to the application within the fiscal year of the segregation of 35% of net profit as other equity reserves, provided they are in compliance with the guidelines for distribution of profits as set forth by the supervisory body.

Revaluation surplus

In order to carry out its operation, the Bank revalued its land and buildings to its estimated market value determined by independent appraisers, as allowed by the Prudential Rules of Capital Adequacy. The value of the net revaluation was RD\$915,737. The Bank classified this amount as secondary capital, subject to the authorization of the Superintendence of Banks of the Dominican Republic.

28 Commitments and contingencies

In the normal course of business, the Bank enters into different commitments and incurs certain contingent liabilities. The most important balances of these commitments and contingent liabilities include:

Collaterals granted: Endorsements Other collaterals granted Non-negotiable letters of credit issued Credit lines of automatic use		<u>2015</u>	<u>2014</u>
	RD\$	1,276,049 210,095	1,324,417 227,297
		187,219	132,179
	_	8,495,542	7,498,082
	RD \$	10,168,905	9,181,975

At March 31, 2015 and December 31,2014, the Bank has reserves for possible losses from these operations in the amounts of RD\$134,947 y RD\$134,109, respectively.

At March 31, 2015 and December 31, 2014, the Insurance subsidiary and the Health Insurance Administrator (ARS) had contingent liabilities for retained risk, estimated as follows:

		<u>2015</u>	<u>2014</u>
General risk Individual life insurance Collective life insurance	RD\$	641,848,135 6,395,582 33,625,186	607,039,260 5,825,548 28,528,038
	RD\$	681,868,903	641,392,846

According to the practices of the insurance company, most risks retained are reinsured under catastrophic coverage and excess loss.

(a) Leasing of offices, buildings and automatic teller machines (ATM)

The bank has lease contracts for the premises in which some of its administrative offices, branches, business centers and ATM's are located. For the periods of three month ended March 31, 2015 and 2014, expenses for this concept amounted to approximately RD\$129,957 and RD\$83,330, respectively, which are recognized in other operating expenses in the accompanying consolidated income statements-statutory basis.

Notes to the Consolidated Financial Statements - Statutory Basis

(In Thousands of Dominican Pesos)

(b) Superintendence of Bank fees

The Monetary Board of the Dominican Republic requires financial entities to make a contribution in order to cover the inspection services that are conducted by the Superintendence of Banks of the Dominican Republic. The expense for this concept for the three month periods ended March 31, 2015 and 2014 was of approximately RD\$161,423 and RD\$149,330, respectively, and is recognized in other operating expenses in the accompanying consolidated income statements-statutory basis.

(c) Contingency fund

Article 64 of the Monetary and Financial Law No. 183-02 dated November 21, 2002 and the Regulation for the Operation of the Contingency Fund, assumed through the First Resolution issued by the Monetary Board on November 6, 2003, authorizes the Central Bank of the Dominican Republic to collect quarterly contributions from the entities of financial intermediation for this fund.

The contribution shall be 0.25% of quarterly total assets minus the quarterly supervision quota charged by the Superintendence of Banks of the Dominican Republic. This contribution shall not exceed 1% of total deposits from the public.

Expenses for this concept for the three month periods ended March 31, 2015 and 2014, was of approximately RD\$58,485and RD\$47,158, respectively, and are recognized in other operating expenses in the accompanying consolidated income statements - statutory basis.

(d) Banking consolidation fund

For the implementation of the Exceptional Program for Risk Prevention of the Entities of Financial Intermediation according to Law 92-04, the Central Bank of the Dominican Republic created the Banking Consolidation Fund (FBC) with the main purpose of protecting the depositors and avoiding systematic risk. The FBC was created with mandatory contributions from the financial entities and other sources as established by the above mentioned law. Such contributions are calculated considering customer deposits with minimum annual rate of 0.17% to be paid quarterly.

Expenses for this concept for the three month periods ended March 31, 2015 and 2014, was of approximately RD\$125,821 and RD\$104,290, respectively and are recognized in the line item other operating expenses in the accompanying consolidated income statements - statutory basis.

Notes to the Consolidated Financial Statements - Statutory Basis

(In Thousands of Dominican Pesos)

(e) Credit card licenses

MasterCard credit cards

The Bank has a contract with a foreign company for the nonexclusive use of MasterCard brand for charge card services, credit or debit card. The Bank does not pay fees for the right of use of MasterCard. The Bank has the commitment to open a line of credit for no less than US\$5 for each MasterCard Gold card issued. The license is perpetual; subject to the termination provisions set forth-in the contract.

Visa credit cards

The Bank has a contract with a foreign company for the non-exclusive use of Visa and Electron charge card services, credit or debit card. The Bank does not pay fees for the rights of use of Visa. The duration of the license is perpetual; subject to the termination provisions set forth-in the contract.

(f) Lawsuits

As of March 31, 2015 and December 31, 2014, there are several lawsuits and demands originated in the normal course of the Banks operations. The Bank considers together with its legal advisors that the resolution of these claims will not result in an adverse material effect. As of March 31, 2015 and December 31, 2014, the amount reserved to face these demands is of RD\$87,765 and RD\$94,945 respectively, and is recognized in other liabilities in the accompanying consolidated balance sheets - statutory basis.

In the normal course of its operations, the subsidiary entity Seguros Banreserva, S. A. has several commitments and contingent liabilities resulting from claims, lawsuits and other legal proceedings seeking coverage for damages from the insurance policies. The Company has established the reserves that it considers necessary to cover these claims and demands based on its experience in the insurance business.

(g) Claims for casualties

The subsidiary Seguros Banreservas, S. A. has received insurance claims for catastrophes that arose in the normal course of business, which have occurred at December 31, 2014. The Bank initiated the operational processing of claims which to date have not been finished. The Bank's management expects that the ultimate effect of this process will not have a material effect in relation to the financial position of the Bank and that the main risk is assumed by the reinsurers.

Notes to the Consolidated Financial Statements - Statutory Basis

(In Thousands of Dominican Pesos)

(h) Guaranteed minimum return

At March 31, 2015 and December 31, 2014, the subsidiary Administradora de Fondos de Pensiones Reservas, S. A., is committed minimum annual return, guaranteed by law, which shall be equal to the weighted average return on pension funds individually funded less than 2.0 and 1.9 percentage points, respectively, as required by Article 103 of Law 87-01. If the subsidiary stays below the weighted average calculated by the Pensions, have a commitment to pay to the fund.

Notes to the Consolidated Financial Statements - Statutory Basis

(In Thousands of Dominican Pesos)

- (a) The Bank has not performed an analysis of fair values of its loans portfolio, customer deposits, outstanding securities and borrowed funds, whose market values might be affected by changes in interest rates.
- (b) There is not an active stock market in the Dominican Republic where fair value of these investments in shares can be obtained. Nevertheless, for investments in shares of entities that are listed in active markets, with a book value of RD\$38,341 and RD\$37,949, respectively, the market value was RD\$179,642 and RD\$170,886, respectively.

37 Transactions with related parties

The First Resolution of the Monetary Board dated March 18, 2004 approved the Regulation regarding Credit Limits to Related Parties, which established the criteria to determine who is a related party of financial institutions.

Operations and significant balances with related parties in accordance with the criteria established by the Regulation regarding Credit Limits to Related Parties as of March 31, 2015 and December 31, 2014 are as follows:

	At March 31, 2015			
	Current <u>Loans</u>	Past due Loans	<u>Total</u>	Collaterals
Related through ownership	67,572,769	-	67,572,769	Unsecured
Related through management	9,679,522	60,583	9,740,105	3,716,790
		At Decemb	er 31, 2014	
	Current	Past due		
	<u>Loans</u>	<u>Loans</u>	<u>Total</u>	<u>Collaterals</u>
Related through ownership Related through	45,731,503	-	45,731,503	Unsecured
management	8,988,772	157,674	9,146,446	5,317,801

The loans related to the ownership correspond to loans to the Dominican Republic Government and its agencies, which are excluded when determining the technical relations related to credit concentration.

Notes to the Consolidated Financial Statements - Statutory Basis

(In Thousands of Dominican Pesos)

As of March 31, 2015 and December 31,2014, loans related to the management of the Bank includes RD\$9,740 and RD\$7,924 million, respectively, which were granted to employees at interest rates more favorable than those to unrelated parties in accordance with the policy for personnel incentives. Similarly, deposits with related parties maintain interest rates at different conditions from those of unrelated parties.

The most significant balances and transactions with related parties through ownership for the years ended at March 31, 2015 and December 31, 2014 include:

38 Pension fund

The Bank makes contributions to the following pension plans:

a) A pension plan with defined benefits and other pensions for employees not covered by Social Security Law No. 87-01 of May 9, 2001, which established the Social Security System of the Dominican Republic. Until June 30, 2014, contributions to this plan correspond to 12.5% of the monthly salaries of officials and employees paid from July 1st, 2014. This contribution was increased to 17.5%, plus 2.5% of the gross profits of the Bank, as provided by the statute of the Pension Plan approved by the Board of Directors. Additionally, the Bank may also make extraordinary contributions based on the results of actuarial studies. A summary of the financial information of the (unaudited) plan, is as follows:

Net position of the plan	RD\$	(405,942)	(405,942)
for past services Net assets of the plan	RD\$	(9,149,735) 8,743,793	(9,149,735) <u>8,743,793</u>
Present value of obligations		<u>2015</u>	<u>2014</u>

The expense recognized during the periods of three month ended at March 31, 2015 and 2014 amounted RD\$154,682 and RD\$130,665, respectively, including extraordinary contributions of RD\$60,582 for both periods, in order to cover the deficit until 2019, as authorized by the Superintendence of Banks.

b) The Superintendence of Banks by Circular SB: ADM / 0681/10 of December 31, 2010, did not object that the Bank annually recognize since 2011, an extraordinary payment of RD\$242.3 million for a period of nine years, to cover the actuarial deficit determined by an actuarial study conducted in 2007. For such purpose, the Bank was required to submit to the SB the Board of Directors Minutes that approved the transaction a study with recommendations on the financial position and viability over the next nine years and the balance of the actuarial deficit of the plan as of December 31, 2010. This information was provided to the SB through Communication ADM-1384-11 dated March 14, 2011.

Actuarial assumptions

At March 31, 2015 and December 31, 2014, the principal actuarial assumptions and other basic plan information used in determining the actuarial liabilities are as follows:

40 Other disclosures

40.1 Implementation of future standards

According to the Second Monetary Board Resolution dated March 21, 2013, minor commercial debtors under loans granted prior to May 31, 2013, and its consolidated debts in the domestic financial system to be converted to major debtors, should be evaluated on their payment capacity rather than on arrears or payment history basis. The effect on the required provisions resulting from this situation must be recognized in the first assessment made by the Bank in 2014.

Notes to the Consolidated Financial Statements - Statutory Basis

(In Thousands of Dominican Pesos)

41 Footnote disclosures required by the Superintendence of Banks

Resolution No. 13-94 of the Superintendence of Banks of the Dominican Republic and its amendments sets the minimum disclosures that the consolidated financial statements of financial institutions should include. As of December 31, 2014 and 2013 the following notes are not included because they are not applicable:

- Earnings per share.
- Significant discontinued operations.
- Changes in share ownership.
- Regular Reclassification of liabilities of relative significance.
- Gains or losses on sales of fixed assets or other assets, in subsidiaries, branches or offices abroad
- Losses arising from disasters.
- Effects of change in market value over the book value of investments in securities
- Events occurring after the reporting period.
